Solar Energy For Equipment, Buildings, Campuses Or Cities

Led Lighting To Reduce Power Consumption

The world is running out of energy resources and we at SIOT are striven to work on producing smart energy solutions for the future. We understand the importance and the need of optimizing the use of green energy. With this technology, our offering allows you to analyse your power needs and suggest the optimal use of earth friendly options such as solar and LED for best results.

Smart Energy Solutions by SIOT

Smart Iot Solutions Believes In Building A Future With Green And Sustainable Energy

Our product allows you to carefully monitor the optimal usage of these resources and a carefully chosen mix of OEMs and Service providers all you to implement the best in class solution for your installations. We use a time-tested and well-defined model for existing power resources as well. Based on our power consumption v/s power

LED

The technology of light emitting diodes is noted for having extended lifespan, reduced consumption of energy and lower requirements of maintenance. LED has the capability to reduce your power consumption by up to over 80%. LED lights are commonly available now but the key lies in an intelligent implementation of the same. From carefully profiling the lighting requirement to implementing the same – we get the services implemented as per your needs. However the key to our solution is the ability to manage these implementations for maximum continuous benefits once installed.

Solar Power

With the assistance of improved sensor options and battery systems, adopting solar technology in everyday life has become more feasible and easier to achiev Energy ideas extend to actual implementation of a solar micro-grid for industrial and home installations. You may choose to implement solar on a per-unit basis or a per-project basis. From small micro-units to large smart cities – our solar power solution ensures the ability to monitor your solar installation consistently.

Smart Energy Consulting

We identify the timetable, investment and objective for smart energy usage. Our experts help our clients with the management, execution and setting-up of the solutions that they seek from Smart IoT. We deliver Smart Energy. We deliver value.

SIOT Understands

That Every Smart Initiative Has Its Own Design & We Have Modularized Our Solutions To Suit The Needs Of Our Clients

Robust Product Design Derived From Years Of Experience

Integration Of Sensors And Software To Work Seamlessly

Modular Apis For Easy Integration

Wide Variety Of Oems For Selecting Components & Sensors Based On Needs

Manpower Services Across India To Provide Ability To Implement And Maintain

Process-Oriented Approach To Ensure Delivery Of Quality Products

Our Products And Solution

Smart Highway

Smart Security

Smart Access

Smart Poles

Smart Energy

Our Services

• Consulting   • Software and O&M

About Us

SIOT Has Been Conceptualized And Is Run By Industry Experts

With the advent of "Internet of Things" and the ability of sensors to talk to each other as well as integrate with actuators to implement - our expertise lies in formulating custom-solutions for the infrastructure industry - be it smart cities, smart campuses, smart buildings or smart roads & highways!

SIOT is based out of Bangalore, India - the hub of IT in India. Our natural inclination towards use of technology to bring efficiency in businesses is enabled by the vibrant tech community that we are in the midst of.
