Smart IoT Services

Strategy Consulting and Design of your Smart Initiatives

SIOT provides consulting and services for all your smart initiatives. Every business that aspires to build an element of smartness leveraging technology can talk to us. We understand your objectives and design the best suitable solution for your needs. Our Consulting experts as well as Technology Architects provide a unique combination of industrial and technical knowhow that you can leverage to get a head-start in your projects - predictably and reliably!

Consulting

Don't Know Where To Start On Your Organization Or Project's "SMART" Strategy?

It's time to get the help from the experts. We are unique in this because we have stitched together an enviable consortium of eminent individuals who are consultants that can help you in defining your strategy custom-made for your business needs! With our onboard consultants and a very unique alliance of individual CxOs from some of the most relevant companies in this space in India - our goal is to bring this important element to allow every organization that wants to do so without having to spend millions even prior to getting started!

Smart Campuses, Smart Buildings, Smart Cities and Smart Roads & Highways - we cover them all. Whether it is an existing infrastructure or a Greenfield project, Whether it is a BIG project or a SMALL project - we are right here to understand your business (which you know best) and suggest a technology-enabled path for it to get "smart". We back it up with going all the way from defining strategies to working with you through the implementation to prove what we suggest.

OUR SERVICES

Software And O&M

Smart Cities And Smart Highways Will Need Smart Software.

We have the right setup if you are looking to develop well-crafted software solutions including an ability to have web and mobile applications that can make a difference to the way you see information or perform transactions.

Software

World-class' is a word we often hear and to us that implies building a solution that meets good global standards. Our software solutions team can help you build solutions that can create an impact globally and allow your business to use technology to get smarter. Our software teams are enabled with the latest technologies and follow the agile methodology to deliver quick and deliver results!

Hardware

If you are experts at software or have products and services around which your business works - you would be requiring expert solutions that are custom built for your interaction with the hardware. From circuit design to controllers - our hardware solutions design team can design the best solutions for your needs. With qualified sourcing from all over the world - you can be assured of getting hardware solutions that integrate easily through APIs that we provide and are optimal on pricing!

O&M Services

Best projects often face a challenge with lower-quality services. Your operations can be serviced effectively by the same work-force if they are led by industry veterans who know how to manage such projects most efficiently and have a track record that is enviable. Work with us for all aspects of Operations and Maintenance for Roads & Highways, Cities, Municipalities, Corporates and Campuses. Smart services are what we design - so if you have a unique O&M requirement - we are the right team to connect to. Important - while agencies may be used to deliver the actual on-ground manpower - project management as well as SLA

Procurement Services

A very unique service provided by us to our clients - this service allows you to get access to the vast world of sensors for your IOT projects. Since our team has built the capability and connects with OEMs - we are happy to help you source electronics that are very relevant to your project needs. The OpEzee Marketplace (www.opezee.com) is backed up with a service team that can help you with custom-procurement needs and delivery of the orders through our platform-enabled process.

SIOT Understands

That Every Smart Initiative Has Its Own Design & We Have Modularized Our Solutions To Suit The Needs Of Our Clients

Robust Product Design Derived From Years Of Experience

Integration Of Sensors And Software To Work Seamlessly

Modular Apis For Easy Integration

Manpower Services Across India To Provide Ability To Implement And Maintain

Process-Oriented Approach To Ensure Delivery Of Quality Products

Our Products And Solution

Smart Highway

Smart Security

Smart Access

Smart Poles

Smart Energy

Our Services   • Consulting   • Software and O&M

About Us

SIOT Has Been Conceptualized And Is Run By Industry Experts

With the advent of "Internet of Things" and the ability of sensors to talk to each other as well as integrate with actuators to implement - our expertise lies in formulating custom-solutions for the infrastructure industry - be it smart cities, smart campuses, smart buildings or smart roads & highways!

SIOT is based out of Bangalore, India - the hub of IT in India. Our natural inclination towards use of technology to bring efficiency in businesses is enabled by the vibrant tech community that we are in the midst of.
